

Z-LOCK

The Z-Lock universally compatible locking power cord locks into place on both sides, regardless of the brand of IT hardware or the manufacturer of PDU / plug strip.

V-LOCK

Use with any APC AP8000 series rack PDU to secure the C14 or C20 end to the power source. To lock the C13 or C19 connectors the inlets must have the corresponding V-Lock.

W-LOCK

Use with any APC AP8000 series rack PDU to secure the C14 or C20 end to the power source. Secures the C13 or C19 female ends via an integrated spring loaded grip.

WS-LOCK

Use a Secure Sleeve to tighten the C14 or C20 ends. Secures the C13 or C19 female ends via an integrated grip that grabs the ground pin on any mating inlet.

P-LOCK

Use with any ServerTech Lockable CDU, Raritan SecureLock PDU, or Emerson Knurr PDU to secure the C14 or C20 end to the power source.

DUAL-LOCK

Use with any ServerTech Lockable CDU, Raritan SecureLock PDU, or Emerson Knurr PDU to secure the C14 or C20 end to the power source. Secures C13 or C19 female ends via an integrated grip.

IEC-LOCK

Use with Geist PDU Strips that have been configured with IEC Lock proprietary outlets to secure the C14 or C20 end. Secures the C13 or C19 female ends with a spring loaded grip.

SECURE SLEEVES

Augment existing cord retention strength with Secure Sleeve C14 / C20 plug or C13 / C19 connector covers. Retrofit existing cords inexpensively.

CUSTOM CORDS

We can custom mold a wide variety of plugs and splitter options. To build your own, use our custom cord configurator at www.stayonline.com/cordbuilder.

Multiple color options are available.
